

Fistula or Graft Care Instructions

If you have problems with bleeding or wet dressing after dialysis, follow these instructions:

1. Press down on access without removing current dressing for 5-10 minutes or longer, until bleeding stops
2. Replace and re-tape gauze when bleeding has stopped
3. If the bleeding won't stop after applying pressure, call 911

Supplies included in this packet: (4) 4x4 gauze (1) paper tape

Replace these supplies when used. You can find them at any drug store.
