# Clarity Tips & Tricks – Week 1

- When printing **Medication Labels**, select **Viewer** for the **Output Type** (instead of PDF)
  - The alignment at the bottom of the page might be off it you leave it as PDF

- If you need to reset/re-enter the Patient ID in the **BBraun** machine:
  - Unclick the **Start Time** from the Pre Treatment tab in **Real-Time Charting**
  - Click on the **Red Man** on the BBraun
  - Enter the Patient ID #
  - Click on the **Green Man** on the BBraun
  - Click on **Start Time** on the Pre Treatment screen and enter actual start time
- Total **Treatment Time** on the **Post Treatment tab** is in **minutes**
  - Do NOT change this time to hours—it will create treatment variance errors
- **Medication Tips:**
  - Most meds that are administered on dialysis should be ordered 3x/week (In-Center)
  - **Mircera** and **Zemplar** (for In-Center) need to be ordered **On Selected Days** (frequency)
    - **If a Mircera or Zemplar dose is not given, the order needs to be adjusted for a new date. (New tasks will not generate from "Not Given")**
  - **PRN Orders** are "one and done" for the run. But they will show up in all visits if they are entered with a frequency of **3x/week** (for In-Center).
  - **Adm Type** drives where a medication shows up"
    - **Adm on Dialysis** (In-Center—RTC)
    - **Self Adm on Dialysis** (Home Hemo)
    - **Facility Adm** (Clinic Visits, Home Program)

- **Bulk Adm** (do not use)
- Leave blank when entering home meds
  - o **Medications will need to be moved with schedule changes**
    - You will get a popup to address medications scheduled for "on selected days"
  - o **Use dose counter for time limited medications rather than date range**
    - This is a better option in case patient misses runs
- **Finding Patient Information**
  - o **Medicaid #s**: Registration > Insurance Information > Policies
  - o **MD phone #s**: Organization > Physicians
  - o **Nursing home addresses**: Organization > Nursing Homes
- **Patient Chart View**
  - o Review labs—there is no acknowledge button
  - o Review treatment history—can see accesses used
  - o Review medications
  - o Launch to Real-Time Charting from here
