

Facility names and abbreviations

The following list of facility names are for **internal use only**. Use full facility names when communicating externally ("Northwest Kidney Centers Kirkland" for example).

Please transition to the list of abbreviations below for all internal communications and use in computer systems as time allows (plan for a transition over the next six months if possible). Using the full facility name is always preferred, but when using an abbreviated version, please select from the following. If software has character limitations, use all the letters possible (if only 6 letters fit, Broadway would be "Broadw". Please transition away from the "BKC" kind of acronyms.

This clarity will help reduced errors and improve safety of our staff and patients.

Thank you!
