

# Clarity Monthly Update

## July 2021

### General Information

---

The 3<sup>rd</sup> Sunday of every month Visonex updates Clarity with fixes to issues reported and enhancements based on client feedback. Following is a general overview of those fixes and enhancements that occurred on Sunday July 18, 2021.

### What's Fixed in Clarity

---

1. When adding a **Patient>Patient Infection** an incorrect message about the access would display inappropriately if a required field was missed. This is now fixed.
2. A bug that caused some text in the **\*Patients with Infections\* report** to be cut off has been fixed.
3. In **Patient>Patient Infection** the Fever>37.8C is no longer showing additional symbols.

### What's New in Clarity

---

1. **Treatment Alerts Start Date** will now display at the beginning of each Alert. This will allow you to determine if the Alert is still valid or needs updating.

Treatment Alerts	04/21/2021 - Wheelchair 16.6kg
	12/01/2020 - OFF PROTOCOL FOR MIRCERA

2. When a patient schedule is updated, **Last Given** dates in **Patient>Medication Management>Medications** and in **RTC Medications/Imn** will appear in green until it is administered. It will become black once it is administered.
3. To add, update or end an **Infection** from **Real-Time Charting Nurse Assessment** Tab, users now need click the [Patient Infection](#) link in order to accommodate the following additional information in Patient Infection screens.

- In **Patient>Patient Infection**, the **Recent Cultures** will now pull cultures within 15 days of the **Suspected Infection Start Date**.

Current Anti-Infective Medications	
Associate current medications to this Infection	<input type="checkbox"/> ceftAZidime - 2000 mg intravenously (1 g powder for injection) each Tue Sun Written order Dr.Alem give Sun/Tues and end 4/20/INTRAVENOUSLY ( 2021-04-13 to Apr 20 2021 11:59PM)
	<input type="checkbox"/> ceftAZidime - 3000 mg intravenously (1 g powder for injection) each Thr Written order Dr.Alem: 3gm qThurs & end 4/20/21/INTRAVENOUSLY ( 2021-04-13 to Apr 20 2021 11:59PM)
	<input checked="" type="checkbox"/> vancomycin - 500 mg intravenously (500 mg powder for injection) each Tue Thr Sun x 5 Doses (1 given of 5)/INTRAVENOUS 04-11 to Apr 13 2021 1:14PM)
	Was this a new outpatient start or a continuation of an inpatient course? <span>New antimicrobial start</span>
