

COVID -19 UPDATE: March 7, 2022

When to Mask & What Mask to Wear

- When you are **ON** the treatment floor/patient care area, wear a medical grade mask.
- When you are **OFF** the treatment floor/patient care area, wear a medical grade mask.
- When you are taking care of or working with a **COVID positive patient or a patient under investigation**, wear a **FIT TESTED** N95 respirator with a medical grade mask with face shield or a **FIT TESTED** N95 respirator with a medical grade mask and full-face shield (wipe down with Oxyvir after doffing).
- You can continue to wear your own respirators (KN95s or KF94s) and we will continue to supply non fit tested KN95 type respirators for both staff and patients who wish to continue wearing them.
