

# Clarity Monthly Update

## September 2022

### General Information

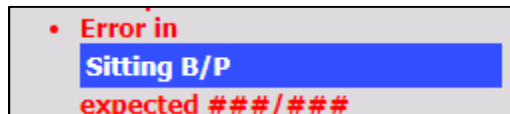

---

On a regular basis Visonex updates Clarity with fixes to issues reported and enhancements based on user feedback. Following is a general overview of those fixes and enhancements installed on September 18, 2022.

### What's Fixed in Clarity

---

1. **Med Date of next dose not updating if med is Postponed** – If a missed Treatment was entered into RTC and a medication that was On Selected Days and scheduled for every 2 weeks or greater was Postponed, the date did not update correctly in the parent order if administered on the next treatment. The fix was deployed on 8/24/2022. Please run the **\*Medications – Date of Next Dose** clinic report to verify no orders were affected.
2. **RTC>Medications/Imn warning message** – there was message appearing in RTC>Medications/Imn stating, “ Please populate the Location field on the PreTreatment tab before administering medications,” even though the Location had been selected and saved. This has been fixed.
3. **Links to Patient Height & Amputation** – links in RTC and other checklists are now functioning correctly.
4. **Clinic Anemia Trends report** was merging data with patients having identical first, middle, and last names. Each patient will now display with the patient’s name and date of birth
5. **Schedule of Clinic Patients – Master report** will now include the end time for all Hemodialysis Prescription types including NxStage Prescriptions.
6. **Blood Pressure Trends report** would indicate an error for BPs entered incorrectly in RTC, e.g., 120-80. To prevent BP documentation entry errors an RTC the following error message will now display.

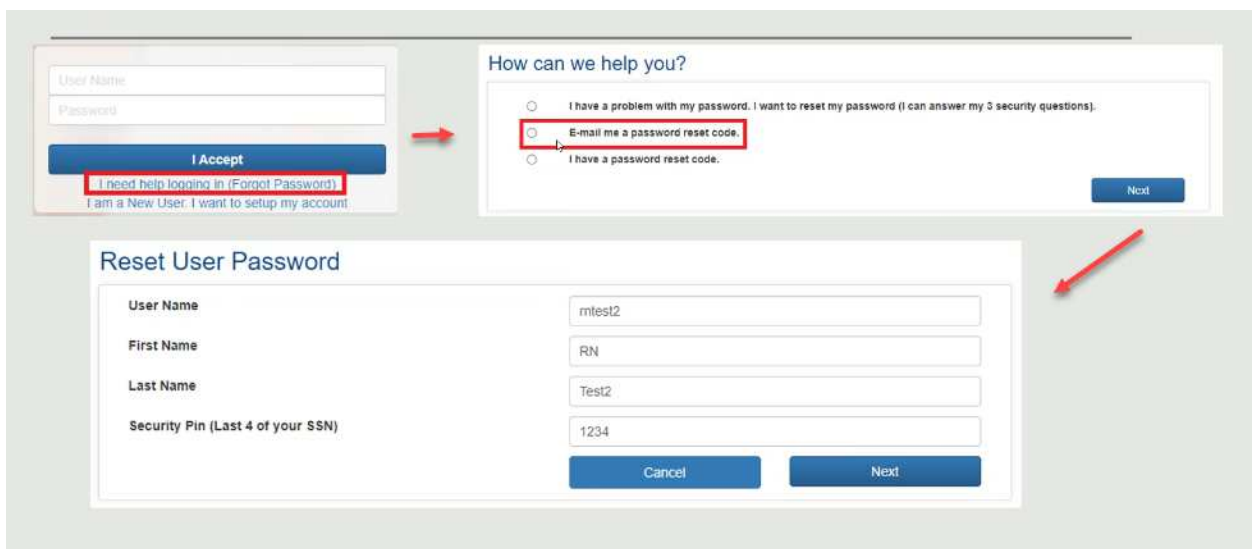

7. **EQRS Submission** – Users no longer get an error message in Organization>Regulatory Submissions>Errors and Data Checks unless they had access to all facilities in their organization.

8. **Email Visonex:** A validation error on the Help>Email Visonex form was fixed on 8/9/2022.
9. **Dialysis Prescription Treatment Duration Dropdown** – If the treatment duration went to two decimals, it was rounding up. Both decimals now appear correctly as of 8/9/2022
10. **PDF Reporting Service** – The issue in which PDF reports were not being receive was fixed on 8/11/2022.
11. **R05 Datachecks** – was not working. The fix was deployed on 8/15/2022 and checks are now displaying in Errors and Data Checks queue.
12. **Document Management Immunizations Viewer** was fixed 8/25/2022.
13. **Immunization Reconcile** error was fixed 8/26/2022.

## What's New in Clarity

14. **Login Screen** – Wording to help users who are not able to log in and new users have been changed.
  - The *I cannot access my account* link is now ***I need help logging in (Forgot Password)***.
    - When clicking on this link, the user now has the option of sending a 6-digit password reset code to their registered e-mail address.

The screenshot illustrates the user flow for password reset. It starts with the login screen where the user selects the 'I need help logging in (Forgot Password)' link. This leads to a dialog box asking 'How can we help you?' with three radio button options: 'I have a problem with my password. I want to reset my password (I can answer my 3 security questions)', 'E-mail me a password reset code.', and 'I have a password reset code.'. The second option is selected. This leads to the 'Reset User Password' form, which includes fields for User Name (mtest2), First Name (RN), Last Name (Test2), and Security Pin (Last 4 of your SSN) (1234). 'Cancel' and 'Next' buttons are at the bottom.

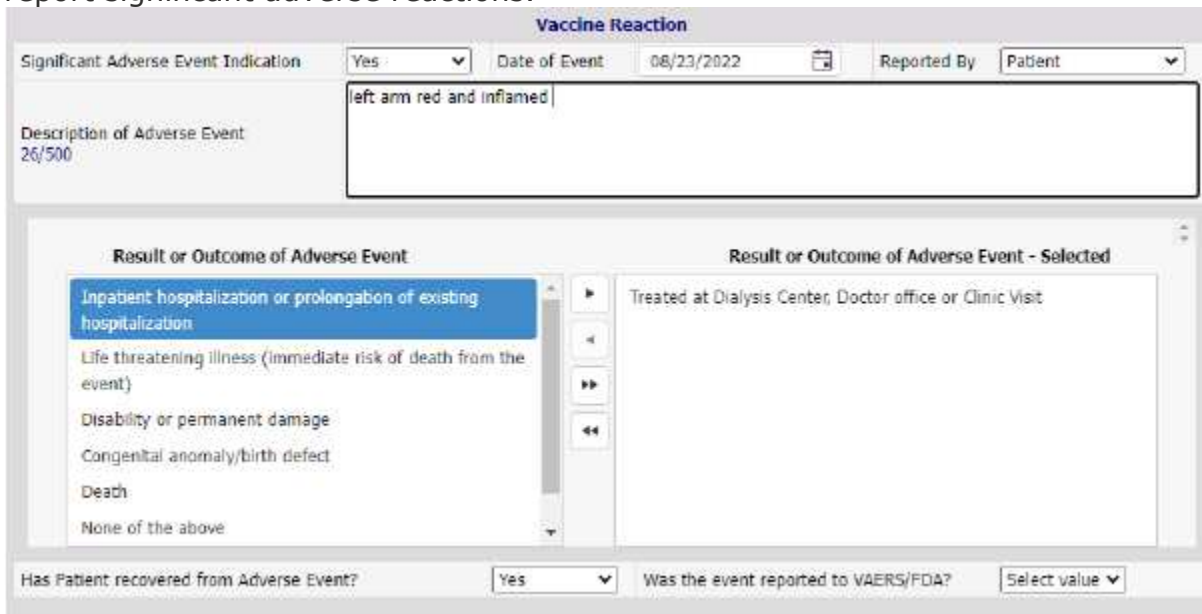

The user can then go back to the login page and select *I need help logging in (Forgot Password)*. This time select *I have a password reset code*. Enter your username and the reset code, click next, and enter a new password.

## Reset User Password

User Name	<input type="text"/>
Password Reset Code	<input type="text"/>
	<input type="button" value="Cancel"/> <input type="button" value="Next"/>

- In the login screen, if a user enters a username or password that does not match the records, the error message is now: *The information does not match our records. If the problem persists, please contact the Clinic Manager/Super User.*

**15.VAERS (Vaccine Adverse Event Reporting System)** – Healthcare providers are required by law to report **VAERS**. A section has been added to the bottom of the **Immunization** form to comply with EQRS requirement for dialysis organizations to report significant adverse reactions.

- The following elements will be sent with the immunization:
  - Did a Significant Event occur?
  - Description of the Event
  - When did the Symptoms start?
  - Has it been reported to VAERS/FDA
- If no documentation exists Significant Event will be sent as **Unknown**
- A new Clinic report **Clinic Immunizations Adverse Events** was created.

**Clinic Immunization Adverse Events**

Kidney Centers - @@@@ Test Clinic 1 @@@@

Report Date: 09/01/2022 01:32PM local (UTC -05:00) KM2

Date Range: 08/01/2022 - 08/31/2022

Patient Name, DOB	Vaccine Name	Date Administered	Date of Event	Reported by	Description of Event	Result or Outcome of AE	Recovered?	Reported to VAERS/FD
@White@, 1028 Waller 09/26/1945	COVID-19, mRNA, LNP-S, PF, 100 mcg or 50 mcg dose	4/6/2022				Sent to ER or Urgent Care	Yes	
@White@, 8015 Waller 09/26/1945	Hep B, adult	8/1/2022	8/17/2022	Patient	sore arm		No	Yes

## 16. Immunizations Hep B –

- A new field has been added to accommodate EQRS reporting requirements. It indicates whether a Hep B administration is a **Booster, Series, or Unknown**. This can be changed at any time but will only be sent to EQRS if it is completed during the month of submission.
- The Administration Status label 'Refused' has been changed to **Not Administered** and the label 'Refused Reason' has been changed to **Reason Not Administered**.
- The option of "Cancelled" has been removed, but past entries will remain in the record. Going forward, staff will select "Not Administered and choose the appropriate reason.

### Add/Edit Immunization

Immunization					
Vaccine Group	HepB	Select Vaccine	Series Or Booster	Booster	
Vaccine	Hep B, adult	Product	ENGERIX-B-ADULT	Manufacturer	GlaxoSmithKline

#### 17. C-CDA Upon request to Visonex:

- it is now possible to set a preference to indicate an Organization ID (OID) for the Document Request.
- For the CERTH process
  - it is now possible to enable NDC codes for the immunizations section or
  - show administered meds details under the procedures section

#### 18. **Organization logo** can now be displayed in Clarity instead of the Organization name upon request to Visonex.
