NORTHWEST Kidney Centers

Clarity Monthly Update
December 2022

General Information

On a monthly basis Visonex updates Clarity with fixes to issues reported and enhancements based on user feedback. Following is a general overview of those fixes and enhancements that will occur on Sunday, December 11, 2022.

What's Fixed in Clarity

1. **Select Vaccine and Select ICD 10 code not working correctly**
   a. We fixed an issue when entering in multiple vaccines that were not in the formulary, the search functionality was not working properly. Additionally, we updated the system to assure ICD10 association to the problem list was corrected.

2. **Real Time Charting error with expired immunizations**
   a. Clients were receiving an error when entering incorrect date format to RTC for Date of Immunization. The error noted, contact support. This has now been updated to display prompts to correct the information.

What's New in Clarity

1. **Resuscitation is now a dropdown, not free text.**

   a. We have upgraded the Advanced Directives form. The Resuscitation Code is now a dropdown instead of free text.

      i. Options include:

         1. Full Code

         2. DNR/DNI

         3. DNR/Ok to Intubate

   b. Your patient's Code status has been mapped to the updated Resuscitation Codes standard picklist. Information that was previously documented in the free text will now

appear in the Comment section.

    c. Any changes to the Resuscitation Code dropdown or comments will be tracked in the Resuscitation Code History and result in a new date being displayed.

2. Improved Functionality – Historical Immunizations
    a. There is now an added option to "Record Historical Immunizations".
    b. You can now document those historical immunizations, including those that were administered in the Clinic greater than 60 days ago. Add an Immunization to a Recent, Unbilled Treatment.

3. E-signature updated to allow 150 unsigned orders per page (was previously 75)

4. Patient Chart View Treatment History Tab updated

    a. Now shows Prescribed Treatment time and Actual treatment time and the

Variance to indicate if your patient is coming off of treatment early.

Date	Start Time	End Time	Prescribed Tx Time	Tx Time	Act-Rx Variance
10/21/2022	05:54	09:59	4	3.95	-0.05
10/19/2022	05:49	09:54	4	4	0

5. **Patient Identifier "floats"**
   a. On longer forms that require scrolling a floating identifier on the right side of the screen. You will see patient name and DOB.

If you need additional information you can click "see more" and the full information will be seen.
