

# Clarity Monthly Update

## August 2023

### General Information

---

Visonex regularly updates Clarity with fixes to issues reported and enhancements based on user feedback. The following is a general overview of those fixes and enhancements that released on Monday, August 7, 2023.

### What's Fixed in Clarity

---

#### 1. Treatment Definition Not Displaying in Patient Schedule

- There was an issue where treatment definitions were set to no longer display in RTC, Enter Treatment form, or Visit Management but were still being scheduled from the Patient Schedule form. It is now possible to have this preference turned off or on for each of those forms.

#### 2. Logout functionality

- Selecting **Logout** in some forms did not bring the user back to the Login page. This is resolved.

### What's New in Clarity

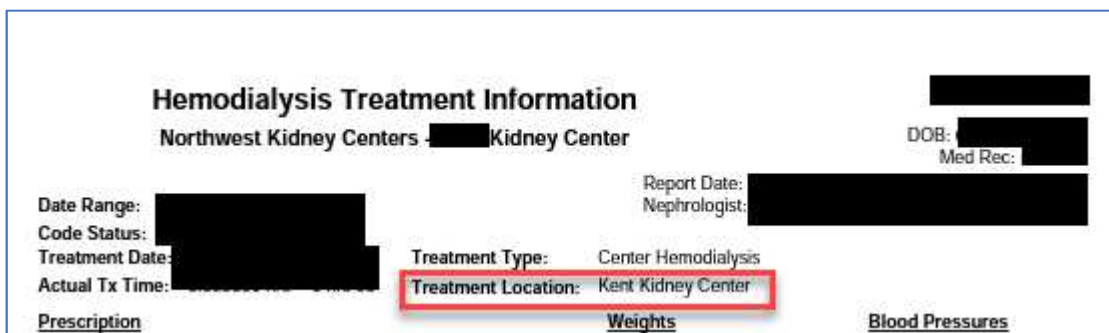

---

#### 1. Lab Results Details Report

- Now lists the most recent labs first.

#### 2. Hemodialysis Treatment Information Report and RTC Hemodialysis Treatment Information Report

- Now displays the facility where the treatment took place

**Hemodialysis Treatment Information**

Northwest Kidney Centers - [REDACTED] Kidney Center

DOB: [REDACTED]  
Med Rec: [REDACTED]

Date Range: [REDACTED] Report Date: [REDACTED]  
Code Status: [REDACTED] Nephrologist: [REDACTED]

Treatment Date: [REDACTED] Treatment Type: Center Hemodialysis  
Actual Tx Time: [REDACTED] **Treatment Location: Kent Kidney Center**

Prescription Weights Blood Pressures

### 3. Nursing Home Reason

- There is now a required Nursing Home Reason dropdown.

**The value in field Reason is required. (Click to fix the error.)**

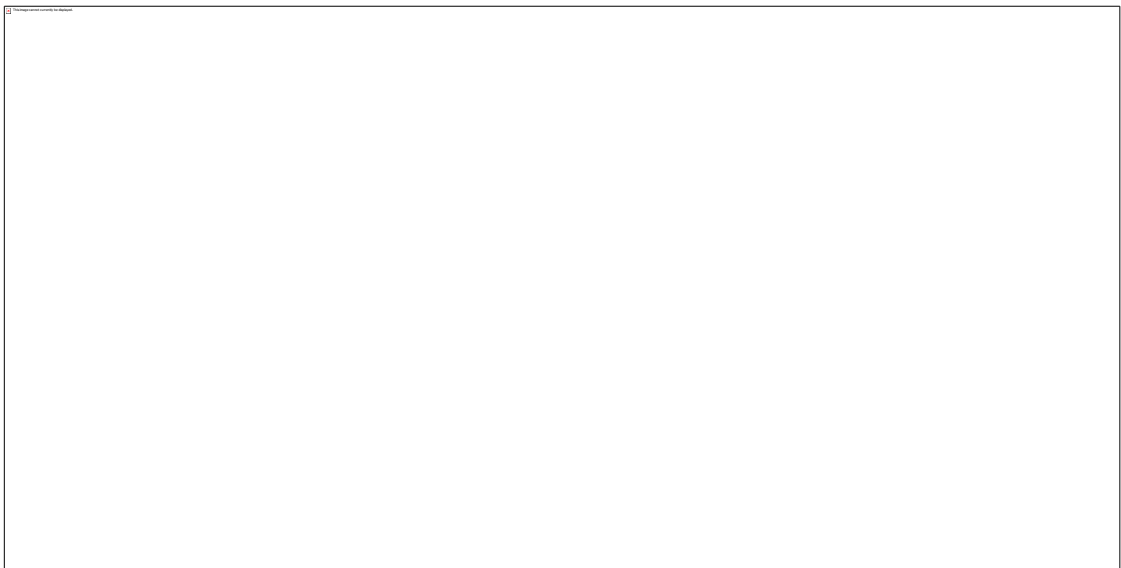

Nursing Home	Advanced Post Acute	Phone (253) 833-1740
<b>Reason</b>	Select value	
Start Date	06/21/2023 00:00	End Date
Comments		

54/250

Add

### 4. Immunization

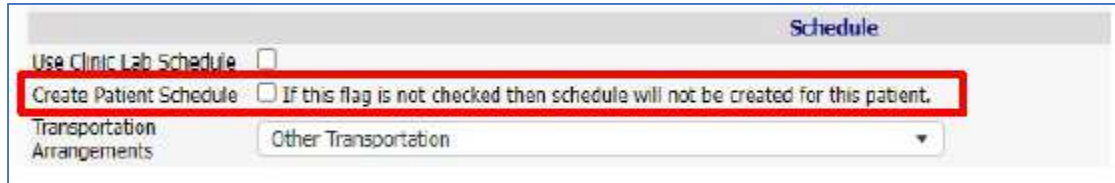

- A **Reason not Administered** dropdown has been added to the Immunization form. It also appears in the Immunization grid under status.

- VIS for Hepatitis B and Pneumococcal conjugate (PCV) dated 05/12/2023 is now selectable. Printable forms are available at [Immunize.Org](https://www.immunize.org)

## 5. Option not to Create Schedule when Patient is Added.

- Currently, when patients are added to Clarity, a default patient schedule is added. An organizational preference is available for the schedule not to be added when the patient is added. This way staff can start the schedule when the patient starts dialysis and missing treatments prior to the start date will not appear on reports. With the automatic addition of a default schedule turned off, staff will still be able to select automatic creation of the schedule for the patient in Registration>General Information.

Screenshot of the 'Schedule' form in Clarity. The 'Create Patient Schedule' checkbox is highlighted with a red box, and the text 'If this flag is not checked then schedule will not be created for this patient.' is visible next to it. Other options include 'Use Clinic Lab Schedule' and 'Transportation Arrangements'.

## 6. E-mail Alerts for Contact Information Edits.

**Users will now receive an e-mail alert when any of the following actions:**

- Add/Edit/Delete User E-mail
- Edit Username
- Set Primary E-Mail Address
- Reset User Password.
