

Interdisciplinary Team Meetings

Erica Lockley

Agenda

What is IDT?

Importance

Kent Kidney Center – Chona Soon

IDT Meeting Minutes Tool

Summary/Expectations

What is IDT?

Interdisciplinary Team work is a complex process in which different health care professionals from diverse fields work together to share expertise, knowledge, and skills to impact patient care

Importance

Research indicates that medical care based on interdisciplinary cooperation is associated with increased patient safety, lower hospitalization rates, and reduced rates of complications and medical errors.

How is this working for Kent?

Chona Soon

PRESENTATION TITLE

Summary/Expectations

*IDT Meetings will be held once a week at minimum

*IDT Meetings should be scheduled for 30-60 minutes

*Nurse Manager to coordinate with IDT members to determine best day/time for weekly meetings

*Nurse Manager will schedule recurring day/time for weekly IDT meeting to allow everyone to plan accordingly

*Attending via WebEx is acceptable for those unable to attend in person if they are **not** at the same location at the date/time of meeting

*Nurse Manager, Nurse Supervisor (if applicable), RD, MSW should be listed as "required" attendees on meeting invite. Medical Director, Clinical Director and Home Program Supervisor for the facility should be invited as "optional" attendees.

*Clinical Director will ensure weekly IDT meetings are being held

Thank you
