

Clarity Monthly Update September 2024

General Information

Renvio regularly updates Clarity with fixes to issues reported and enhancements based on user feedback. The following is a general overview of those fixes and enhancements that will be released on Sunday, September 8, 2024. You will see these updates starting Monday, September 9.

What's New in Clarity

1. Dialysis Access

- 'Angiogram' has been added to the Exam/Procedure dropdown
- 'Regained Function' has been added to the Reason Removed dropdown

2. RTC Medications

- Bulk Supply medications will now display with the prescription dose and form.

Current:

Bulk Medication	Prescription
cinacalcet	1800.00 mg orally Per month (60 mg once a day) (06/06/24 14:56 - current) Last Received 07/10/2024

After the Release:

Bulk Medication	Prescription
cinacalcet	60 mg orally (60 mg tablet) once a day Free Text Information (1800.00 per month) (08/20/24 08:13 - current)

3. PCV Microbiology folder

- Currently, culture and sensitivity results are available through the [Patient Microbiology Detail Report](#) link in the Patient Infection sub-menu or by running the Microbiology Detail patient report in Report Wizard. We will soon also be able view these as a sub-section in the Patient Chart View Lab results tab. Watch for an email with more information.

4. 2746 Death Information

- In Primary Cause of Death and Secondary Cause(s) of Death dropdowns:
 - 'INFECTION-COVID19' has been changed to 'OTHER – COVID-19'
 - 'OTHER – Severe adverse medication reaction' has been added

5. Transplant Waitlist Report

- Data sources are as follows:
 - Registration>General Information
 - Registration>Patient Status History
 - Registration>Patient's Nursing Home
 - Registration>Transplant Management>Transplant Waitlist Form

6. Dialysis Prescription

- For Patients who have >3x/Wk dialysis previously required a second prescription to display the ICD-10 code for the justification of the 4th through 7th treatments.
- Staff can now associate two justifications in the Hemodialysis Prescriptions by clicking on **Add Multiple ICD-10**:

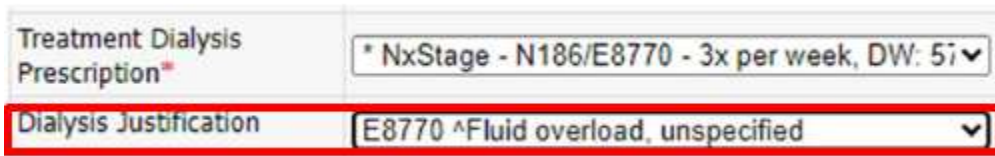

The screenshot shows a form with two justification sections. The primary justification is set to '@N186 - End stage renal disease'. The secondary justification is set to '@E8770 - ^Fluid overload, unspecified'. A button labeled 'Add Multiple ICD-10 (Up to 2)' is highlighted with a red box.

- Once the prescription is saved, the prescription form will display both ICD10 codes

<input checked="" type="radio"/> Current <input type="radio"/> Future <input type="radio"/> All <input type="radio"/> Discontinued			
Start Date	End Date	Prescription Type	Prescription
06/23/2024		NxStage	N186/E8770 3x per week, DW: 57kg, Vol: 20, BFRMin: 300, BFRMax: 450, DFR: 133 ml/

- In Real-Time-Charting, if a dialysis prescription is selected with two ICD10s, staff will need to select from the Dialysis Justification dropdown below.

The screenshot shows a 'Treatment Dialysis Prescription' field with the value '* NxStage - N186/E8770 - 3x per week, DW: 57'. Below it, the 'Dialysis Justification' dropdown is highlighted in red and shows the selected value 'E8770 ^Fluid overload, unspecified'.

- The Treatment History detail has also been updated to display the ICD10 codes associated with the dialysis prescription used

Treatment Dialysis Prescription ** NxStage - N186/E8770 - 3x per week, DW: 57Kg, Vol: 20, BFRMin: 300, BFRMax: 450, CFR: 133 ml/min (7.986L/h), U ▼

What's Fixed in Clarity

1. Unstable CIA incorrectly updating to Stable

- An issue where if a patient was unstable and remained so after the CIA was completed, their status was incorrectly updated to stable. Now, the patient will continue to be marked as unstable unless it is documented that their condition has stabilized.

2. Submenu disappearing while in Immunizations

- If a user was in Patient>Immunizations and went to another main menu, then a selected submenu would disappear. This is fixed.

3. RTC Treatment Tab UFR>999

- Validation has been added to prevent a value greater than 999 to be entered in RTC Treatment Tab UFR.

4. Report Wizard Blank Page

- A bug in which running a report in Report Wizard would result in a blank page has been fixed.
