Martin Luther King Jr.

## 2025 Educational Impact

Role	No. Of Attendees
Technicians	76
Nurses	32
Home	9
Other Disciplines	5

Training Education Satisfaction

4.8

KPI	Why It Matters
111 Staff Educated	Scale and operational support
89.87% Avg Competency Score	Quality, readiness, and patient safety
4.8 out of 5.0	Staff engagement and program credibility
14 Training Attrition	Transparent workforce reality

## Quick Procedure Reminders

### 1. Needle Site Preparation

Clean each cannulation site with an alcohol pad for 30 seconds using a circular motion. Repeat with a second alcohol pad and cannulate while the site is still wet.

### 2. Cleaning Blood Spills

Immediately wipe all visible blood using disposable absorbent pads or disinfectant wipes and discard materials in the infectious waste container. Re-clean the area with fresh disinfectant wipes, ensuring proper contact time. Wear full PPE throughout the process, dispose of gloves in the infectious waste bin, and finish with handwashing using soap and water.

“Together, let’s keep every patient safe and every process strong!”
